

HEADLINE: RIEtech Global, LLC Recommended for ISO 9001:2008 Registration

Date: 14 April 2010

For Immediate Release

In October 2009, RIEtech Global LLC (formerly Sagebrush Technology) began development of a Business Management System (BMS) that not only encompasses all facets of company operation, but is structured to ensure compliance with the ISO 9001:2008 standard. Assisted by Integrity Business Corporation's owner, Chris Hoover, the BMS was setup and deployed in just under six months. This process can normally take between two to three years for full implementation.

During the period of March 17th - 19th, RIEtech underwent an external audit conducted by QMI-SAI Global. The audit found no discrepancies in the BMS and RIEtech received a recommendation for ISO Registration on March 20, 2010. The certificate was received 14 April and RIEtech Global, LLC is now proud to announce that the company's BMS is in compliance with the requirements of ISO 9001:2008.

The scope of the registration covered the RIEtech Business Management System for providing engineering design, analysis, assembly and testing of a wide range of electro-mechanical products to commercial and government clients. RIEtech's services include prototype development, custom OEM designs, manufacturing and repair capabilities.

Obtaining ISO Registration and full deployment of RIEtech's Business Management System will ensure that the company remains focused on customer satisfaction and continual improvement as the company continues to grow and expand. Looking ahead, RIEtech will be expanding the company's capabilities beyond precision motion control, and into new areas of product development and distribution.
